FLORIDA MEDICAID PRIOR AUTHORIZATION

Fuzeon®

(Maximum Length of Approval is 6 Months)

Note: Form must be completed in full. An incomplete form may be returned.

Use with PA Form

Question 1 and 2 For initiation of therapy, genotype, and phenotype results should be dated within the past 12 months.

Note: Genotyping and phenotyping cannot be effectively done if the viral load is less than 1000 copies/mL. Therefore, genotyping and phenotyping is not required for those recipients currently on Fuzeon therapy.

Question 3 Only acceptable response for approval is “Yes.”

Question 4 Only acceptable response for approval is “Yes.”

Question 5 New therapy requires verification of:

- 1) Ongoing therapy with other HIV medications
- 2) Compliance on previous therapies
- 3) Labs that demonstrate CD4 counts and antigen levels consistent with medication failure.

Continuation of therapy requires verification of compliance with other medications. If Fuzeon is working, then CD4 counts should be good and viral antigen levels should be undetectable.

Approved Indications

Fuzeon, in combination with other antiretroviral agents, is indicated for the treatment of HIV-1 infection in treatment-experienced patients with evidence of HIV-1 replication despite ongoing antiretroviral therapy.

Approval Period

Maximum of six months.
