Maximum number of doses: 5

Note: Form must be completed in full. An incomplete form may be returned.

	f ≤ 12 months old									
	Hemodynamically significant cyanotic or acyanotic congenital heart disease on medications to control CHF and will require surgery:									
	(Specify Diagnosis Code)									
	Moderate to severe pulmonary hypertension									
ا 🔲	f < 12 months old									
	< 29 completed weeks gestational age at birth (otherwise healthy)									
Dia	gnosis Code: ICD 10: P07.21 – P07.26									
	Chronic lung disease* (GA < 32 weeks): (Specify Diagnosis Code)									
	☐ AND: required supplemental oxygen (for at least first 28 days after birth)									
	*CLD is not asthma, croup, recurrent upper respiratory infections, chronic bronchitis, chronic bronchiolitis, or a history of a previous RSV infection.									
	Severe neuromuscular disease									
	(Specify Diagnosis code)									
	Congenital anomalies of the airways									
	(Specify Diagnosis code)									
	Profoundly immunocompromised									
	(Specify Diagnosis code)									
☐ Cystic Fibrosis with CLD and/or nutritional compromise										
Pre	scriber's Signature: Date:									
RF	QUIRED FOR REVIEW: Copies of medical records (e.g., diagnostic evaluations and recent chart notes), the most recent copies of related									
	s, and supporting documentation for clinically appropriate submissions.									
	The provider must retain copies of all documentation for five years.									
	p									
NOTE: Pharmacies should not submit separate claims for different dosage strength vials to be administered on the same date. Only one compound claim submission will be necessary. For example, if the Synagis dosage is 150 mg, the pharmacy should submit a compound claim that lists the two different strength vials (100 mg and 50 mg).										
We	ight Criteria for Synagis <sup>®</sup> (palivizumab): (Refer to <i>Weight Change Form</i> )									
۰۱۱	All weights must be verified for dosing accuracy
